

Fire VASE Population Summary Atlas

Full cached FIRED event source summarized from the CubeDynamics fire VASE lakehouse pilot tables. This PDF is a population atlas: rendered panels and individual VASE meshes remain derived assets, while the Parquet tables are the current data product.

278,569 real FIRED event rows	2000-2021 ignition years	666,046 total km2 recorded	0.43 median final km2	1.0 median duration days
---	--	--	---	--

Generated 2026-07-22T13:40:36+00:00. Source tables: scratch/fire_vase_run_full/tables. Rows are from the cached FIRED event GeoPackage normalized into Parquet by the lakehouse pilot.

Regional Structure

Region	Events	Share	Mean km2	Median km2	Total km2	Mean days
central	89,584	32.2%	1.33	0.43	119,573	3.3
intermountain	58,896	21.1%	3.26	0.43	192,228	3.2
west	44,783	16.1%	4.61	0.43	206,286	3.1
east	43,972	15.8%	1.47	0.43	64,486	3.8
alaska	41,279	14.8%	2.01	0.21	83,153	2.3
hawaii	55	0.0%	5.82	0.64	320	4.2

Time And Region

The heat map counts event records by broad centroid region and ignition year. This is a manifest-scale view, not a climate-attributed VASE rendering.

Size And Duration

Metric	P01	P10	P50	P90	P99
Final area (km2)	0.215	0.215	0.429	3.220	27.476
Duration (days)	1.0	1.0	1.0	8.0	18.0

Largest Events

Fire ID	Region	Year	Final area km2	Duration days	Peak growth km2/day
429894	west	2020	3,503.87	65.0	53.91
357266	intermountain	2017	2,603.60	14.0	185.97
254774	west	2012	2,046.77	14.0	146.20
144165	west	2007	2,026.16	21.0	96.48
234388	intermountain	2011	1,834.26	29.0	63.25
19287	intermountain	2002	1,775.44	20.0	88.77
21543	west	2002	1,654.16	51.0	32.43
256494	west	2012	1,637.20	19.0	86.17
139617	east	2007	1,555.63	51.0	30.50
387802	west	2018	1,551.12	41.0	37.83
429837	west	2020	1,439.72	25.0	57.59
293242	west	2014	1,431.99	14.0	102.28
63259	alaska	2004	1,430.06	25.0	57.20
386665	west	2018	1,368.88	12.0	114.07
69488	alaska	2004	1,360.94	55.0	24.74

These rows are ranked from the normalized trait table, using FIRED total area and duration attributes. They are candidates for later individual VASE rendering or climate-attributed review.

Longest Duration Events

Fire ID	Region	Year	Final area km2	Duration days
387281	west	2018	486.85	85.0
429894	west	2020	3,503.87	65.0
366159	west	2017	193.41	62.0
387177	west	2018	109.26	60.0
38759	intermountain	2003	185.47	59.0
324250	west	2015	507.02	59.0
366252	west	2017	152.19	58.0
166671	west	2008	84.15	56.0
69488	alaska	2004	1,360.94	55.0
127007	west	2006	100.67	55.0
143483	west	2007	954.80	55.0
345807	west	2016	672.10	55.0
366183	west	2017	46.15	55.0
42235	west	2003	186.11	54.0
144420	west	2007	315.33	54.0

Processing Status

Status	Rows
geometry_complete	278,569

All rows in this atlas are at geometry_complete in the current pilot manifest. Climate, event, trait refinement, VASE slice, and render completion can advance independently as component versions mature.

Provenance And Limits

Field	Value
PDF	output/pdf/fire_vase_population_summary_atlas.pdf
Table root	scratch/fire_vase_run_full/tables
Catalog rows	278,569
Trait rows	278,569
Processing status	geometry_complete: 278,569
Generated	2026-07-22T13:40:36+00:00

Important limit: this atlas summarizes fire-event metadata and derived pilot traits for the full cached FIRED event table. It does not yet include per-fire hourly climate extraction, ring-level VASE slices, climate-colored VASE panels, or rendered meshes for every fire. Those products are designed to be written as external lakehouse assets and then registered back to the manifest.
